Opportunities for Sponsorship & Exhibition

The 5th annual nanoUtah conference will bring together Utah leaders in nanoscience and nanotechnology. The conference is intended to foster collaborations and the exchange of knowledge among scientists, engineers, clinicians, industrial leaders, and students.

Welcome

Dear Industrial Partners,

Please consider joining us as a sponsor and/or industry exhibitor at the 5th annual statewide nanotechnology conference, held at the Marriott City Center in Salt Lake City, Utah on October 15-16, 2009.

Utah is becoming a recognized leader in this revolutionary technology. World-class research teams across the state will introduce new discoveries and highly advanced technologies in the fields of energy, devices and sensors, medicine, and materials and characterization during the conference. This event will provide important networking opportunities and foster collaborations for further research, partnered development, and potential commercialization. We invite you to participate.

Our organizing committee is already hard at work, intending to make the nanoUtah 2009 conference even better than last year's successful event. It will feature keynote presentations by Dr. Mihail Roco of the National Science Foundation and Professor Richard McCreery of the University of Alberta. Dr. Roco was the founding chair of the National Science and Technology Council's subcommittee on Nanoscale Science, Engineering, and Technology. Professor Richard McCreery is the Alberta Ingenuity Scholar in Materials and Interfacial Chemistry at the National Institute for Nanotechnology. Buttressed by presentations from Utah's leaders in nanoscience and nanotechnology, the conference promises to be an event that you will not want to miss.

Visit the nanoUtah web site at www.nanofab.utah.edu/nanoutah09 for program updates and announcements.

Thank you for your consideration, and we look forward to hearing from you.

Best regards,

Marc Porter
