Settings

Configuring the microscope's operating environment.

Displaying the Settings Menu

1 Click [Settings] from the VHX MENU.

Network/Security Settings

The microscope has been set with protection enabled to prevent changes from being made to the internal system. This protection must be disabled to configure the system for connecting external devices, network settings, etc.

Temporarily disabling system protection

```
The following items can be configured or
    Point
N
            installed by temporarily disabling the system's
            protection. Operation of the microscope is not
            guaranteed if any other settings or installations
            are made.
            (1) FTP and share folder settings
            (2) Network settings (IP address settings)
            (3) Printer driver installation
            (4) Language, country and region settings
```

1 Click [Network/Security Settings...] on the Settings menu.

The security administration password input dialog appears.

2 Enter the password and click [OK].
